Step A: Enable the GPRS function via click the menu SMS->Set GPRS param.(The communication port must be opened, and then this step would be available.)

Configure the APN based on your SIM card and then click "Write" to download the configuration into x-Messenger.

| 🗌 Login | Password Protect |
|--------------------|-----------------------------------|
| - System | 1 |
| Timeout | 30 Second Serial number: 12345678 |
| APN: | |
| – Target Network – | |
| Port | 5001 |
| O IP Address | 221 . 226 . 189 . 74 |
| Oomain Name | |
| EXM Network | |
| Port | 1 |
| | Connect to ethernet when power on |

Step B: Do some configurations about email items

Click menu SMS->Set email params

Click "Write" button to download the parameters into x-Messenger

The receiver email address and the alarm text can be edit in the "sms message output" function block..
